

The Alvin Seiff Award

Viking (1976)

PAET (1971)

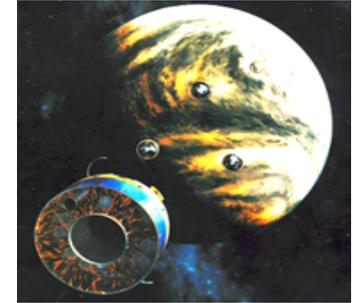

Al Seiff

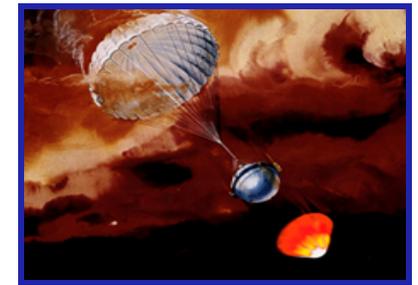

Is bestowed annually by the International Organizing Committee (IOC) of the International Planetary Probe Workshop (IPPW) in recognition of outstanding contributions to the technology, science, and/or mission planning of atmospheric entry probe missions that advance the knowledge of planets or moons in the solar system, and the mentoring of younger engineers and scientists in these fields. These traits are those for which Seiff was legendary in his pioneering of our field.

Because of his extraordinary contributions to the field of space exploration, including being a co-founder of the IPPW series, mentoring younger researchers and especially for his leadership that led to the spectacular success of the Cassini-Huygens probe mission to Titan, the IOC of the IPPW bestows the 2011 Alvin Seiff award upon

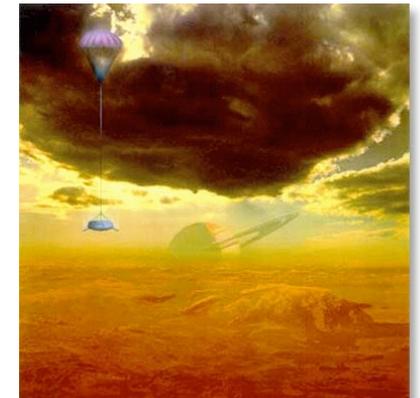

Dr. Jean-Pierre Lebreton

Pioneer-Venus (1978)

Galileo (1995)

Huygens (2004)
