It Began with Apollo

Buzz Aldrin

NASA

[Aldrin, from the 1969 Technical **Debrief]: "In putting [the SWC** pole] in the ground, it went down about 4 or 5 inches. It wasn't quite as stable as I would have liked it to have been, but it was adequate to hold it in a vertical position...Once you go past a depth of 4 or 5 inches, the ground gets quite hard. However, I didn't get much of a cue to this at this point while installing the solar wind experiment."

It Began with Apollo

The Apollo collector device foils were exposed for different durations. It was exposed for 77 minutes on Apollo 11, 18 hours, 42 minutes on Apollo 12, 21 hours on Apollo 14, 41 hours, 8 minutes on Apollo 15, and 45 hours, 5 minutes on Apollo 16.

Buzz Aldrin

NASA

Aldrin: "The solar wind disengaged from its staff quite easily. When it rolled up, it had a tendency to sneak off to the side and crinkle on the edges. I spent some 20 to 30 seconds unrolling it and trying to get it a little smoother. I then remembered that they really didn't care about exact neatness. All they wanted was the material back, because they were going to cut it up in many pieces anyway. So I just bunched it together and it slid into its container (the Teflon<sup>™</sup> bag) fairly easily."

### **Solar Wind Collection Experiment**

Apollo 12

Apollo 12 Mission Patch

NASA

It Began with Apollo

Alan Bean

NASA

Bean: "Solar wind doesn't like to roll up much. (Pause) Little rascal, doesn't want to roll up. (I'll) just wrap it around here best I can, without getting any dirt on it." (Pause)

"Okay, we got that solar wind."

#### It Began with Apollo

Conrad: "Good boy!"

Pete Conrad

NASA

It Began with Apollo

Alan Bean

NASA

Bean: "Houston, we got that solar wind, but it didn't roll up in a very neat package."

#### It Began with Apollo

Launch Control Center, NASA Kennedy Space Center

### Gibson: "Roger, Al. We copy. That's all right." (Long pause)

It Began with Apollo

Pete Conrad

NASA

Conrad: "Hey, it sure didn't, did it?"

It Began with Apollo

Alan Bean

NASA

Bean: "No. It just didn't. It split right near the top."

It Began with Apollo

Pete Conrad

NASA

Conrad: "Can I help you?"

It Began with Apollo

Alan Bean

NASA

Bean: "Yeah. You can hold that, and I'll just try to roll it up as best I can without getting any...I already got a little dirt on it that's not doing any good. (Pause) You see what I mean?"

It Began with Apollo

Pete Conrad

NASA

### Conrad: "Yeah."

It Began with Apollo

Alan Bean

NASA

Bean: "Not a lot I can do about it. I'm sure it's [the solar wind] a good experiment. That thing is fragile."

It Began with Apollo

Conrad: "Here, let me hold this end, and you just wrap it tight. That a boy."

Pete Conrad

NASA

It Began with Apollo

Alan Bean

NASA

Bean: "I'll squeeze it down."

#### It Began with Apollo

Pete Conrad

NASA

### Conrad: "That a..."

It Began with Apollo

Alan Bean

NASA

Bean: "And chase down any of those noble gases or whatever that crud is. Okay. Stick that in there? (To Gibson) Looks bad, but I think it will do the job, Houston. We squashed it in so it's..."

It Began with Apollo

Conrad: "Where is it [the bag]?"

Pete Conrad

NASA

It Began with Apollo

Alan Bean

NASA

Bean: "It's right...Let me get it for you."

#### It Began with Apollo

Launch Control Center, NASA Kennedy Space Center

### CapCom: "Roger, Al."

It Began with Apollo

Alan Bean

NASA

Bean: "There you go. Okay. It just doesn't look so good, Houston."

It Began with Apollo

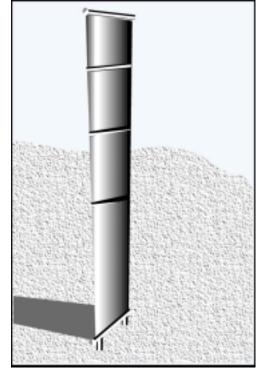

Alan Bean

NASA

[Alan Bean during his technical debrief]: "I would like to recommend that, before the next flight goes up, somebody take a look at what is actually happening to that foil as it sits out in the lunar environment. It may not be the foil that's presenting the problem. It might be (that) the tape that they are using on it actually cracks or gets stiff or something. It may be the same effect they are seeing in those Teflon<sup>™</sup> bags."
