

Cosmic Chemistry: An Elemental Question

The Search for Critical Questions

STUDENT ACTIVITY

- 1. As you try to construct your puzzle, record the clues in the puzzle that helped you complete the task, and explain how these clues helped.
- 2. Was your puzzle complete? If not, describe what you think the missing pieces look like. Be as specific as you can.
- 3. Compare the pieces in your **b** envelope with your predictions in the second question.
 - a. In what aspects were you close to the correct description?

- b. In what aspects were you farther from the correct description?
- c. What characteristics of the puzzle gave you good information about the missing piece?
- d. What was missing in your clues or your analysis of the clues that prevented you from successfully predicting exactly what the missing pieces looked like?
- 4. Following the class discussion, record some critical questions to ask as you begin to solve any kind of problem.
